

## Integration into Work

---

We facilitate the access to employment for the people who need it most

### Miguel Ángel's history

---

**Miguel Ángel. 36 years old. Zaragoza**

**"I've moved from touching bottom to touching the sky."**

When I came, the shop was practically empty. There was nothing. Starting from zero and seeing how everything is, it really makes you feel good. I'm in charge of unloading the goods, of controlling the entire product, and making sure there's nothing missing. Not all companies bet on people like us. They've given me the opportunity, I'm grateful for it and I've done well by them just as they've done well by me. I work the same hours as everyone else, I don't have any perks. That is to say, I'm just one more here. I'm privileged and I feel very happy with the company and with all the staff, to tell the truth. On Sundays I work as a volunteer in a dining-room...for people with no means of subsistence. So I do some good to other people, just as other professionals and people have done. I can hardly believe everything that's happening to me and everything I'm doing. I don't believe it My will-power lies in this ability to show people that I'm capable of even more than what they think. I've moved from touching bottom to touching the sky.
